To our Cooperation Partners

Who we are

Technical Trainers College (TTC) in Riyadh is an institution affiliated to the Technical and Vocational Training Corporation (TVTC). We offer an internationally accredited Bachelor programme to our Saudi students, educating them as vocational trainers. They specialize in

- Mechanical Technology,
- Information and Communication Technology,
- Electronics and Electrical Technology.

With a capacity of 1,200 students, we are a unique institution in the Kingdom of Saudi Arabia.

What we need

We need institutions and companies that are willing to offer our students an internship for six weeks, starting in June 2014, in which they could get a profound insight into work practices. We need partners that are eager to let our students participate practically so they could apply and broaden their knowledge. We need institutions and companies that embrace the idea of a highly educated workforce for the Kingdom of Saudi Arabia.

What we offer

We offer technically trained students who seek to apply their knowledge practically. Our students come with a good command of English so that they are able to communicate in an international working environment. Due to our strict and comprehensive college rules, our students have a good work ethic. They are highly motivated and able to meet deadlines and quality standards.
Some of the companies who already benefited from having Technical Trainers College students as their interns are:

ABB  ThyssenKrupp  STC

SAUDI BINLADIN GROUP

Saudi Aramco

Schneider Electric

Saudi Electricity Company

Detasad

AIRAI

Zamil Industrial

How it works

Together with our student, you discuss about the planned work tasks and which of the proposed time periods to choose for the internship. After you have agreed with the students on all details, the Document of Consent has to be filled out and signed by both you and the student. The student will then bring this document back to TTC for approval. The outcome of this decision will be communicated to the student, who is responsible for informing you in the unlikely case that TTC will not approve his internship at your organization.

How to contact TTC

If you have any questions about the procedure or you need more information, please don’t hesitate to contact us.
